PROFESSIONAL EXPERIENCE

Full Stack Developer — Intern | Code Innovative Technologies (Remote)

Feb 2026 – Aug 2026

- Engaged as Intern full-stack developer to design and build production-facing modules using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL, while completing the final year of a B.Tech in parallel.
- Design RESTful APIs for client business applications, working in Agile/Scrum sprints with regular code review.
- Collaborate using Git branching workflows and GitHub Actions to automate build and deployment steps.

Software Development Intern | Software Beatz (Remote)

Oct 2025 – Feb 2026

- Built full-stack modules with React.js, Node.js, Express.js, and MongoDB, exposing secure REST APIs protected with JWT authentication.
- Wrote unit tests with Jest and ran API test suites in Postman before each deployment to catch regressions early.
- Profiled and optimized MongoDB queries, improving backend response times on key endpoints.

PROJECTS

DentAlva — AI-Powered Healthcare SaaS Platform — [GitHub](#) | [Live](#)

Next.js, TypeScript, PostgreSQL, Prisma, Clerk, OpenAI API, LangChain, Tailwind CSS, Vapi AI

- Built a full-stack healthcare SaaS platform that uses the OpenAI API and LangChain to automate patient-facing workflows such as appointment scheduling and query handling via a Vapi AI voice agent.
- Designed a normalized PostgreSQL schema with Prisma ORM covering patients, appointments, providers, and billing, and implemented Clerk-based auth with RBAC so patients, providers, and admins each see a scoped view.

Grocerin — Full Stack E-Commerce Platform — [GitHub](#) | [Live](#)

React.js, Node.js, Express.js, MongoDB, Stripe API, Cloudinary, Tailwind CSS, JWT, RBAC

- Built a complete e-commerce application with Stripe payment integration and REST APIs covering authentication, cart, checkout, and order management.
- Built separate Admin and Seller dashboards with JWT authentication and role-based access control, and deployed to Vercel with a GitHub Actions CI pipeline for automated builds.
- Used Cloudinary for optimized product image storage and delivery, keeping page load times low on product-heavy pages.
